

StatSkill AI - Sample Training Material

Introduction to Official Statistics

Official statistics are data produced by government agencies to support policy making, planning, and public decision making.

Sampling

Sampling is the process of selecting a representative subset of a population for a statistical study.

Data Quality

Important dimensions include accuracy, completeness, consistency, timeliness, and relevance.

Data Privacy

Data privacy focuses on protecting personal and sensitive information.

Data Visualization

Charts, graphs, tables, and dashboards help communicate statistical information clearly.
